Hazardous Weather

Tonight - 3 PM to 8 PM

Low Potential for Severe Storms

Weather Forecast Office
Amarillo, TX

Issued Aug 10, 2020 1:33 AM CDT

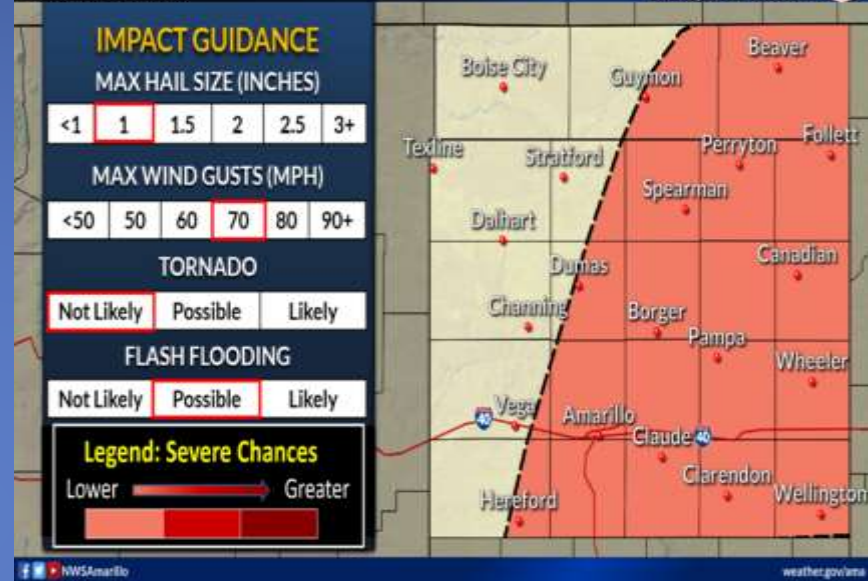

Scattered storms in the west with more isolated storms in the central Panhandles this evening. Gusty winds, small hail, lightning, and moderate to heavy rain will still be possible.

Tonight - 8 PM to 12 AM

Low Potential for Severe Storms

Weather Forecast Office
Amarillo, TX

Issued Aug 10, 2020 1:33 AM CDT

Thunderstorms are possible this afternoon and evening. A few storms could be severe with hail and damaging winds possible.

Hazardous Weather

Thunderstorms are expected this afternoon and evening

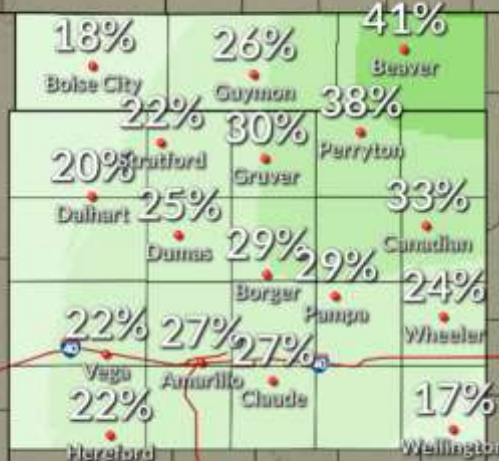

Weather Forecast Office
Amarillo, TX
Issued Aug 10, 2020 4:20 AM CDT

Timing:
3 PM to Midnight

Hazards:
Damaging wind and hail

Severe Location:
Central and eastern parts of forecast area

NWSAmarillo

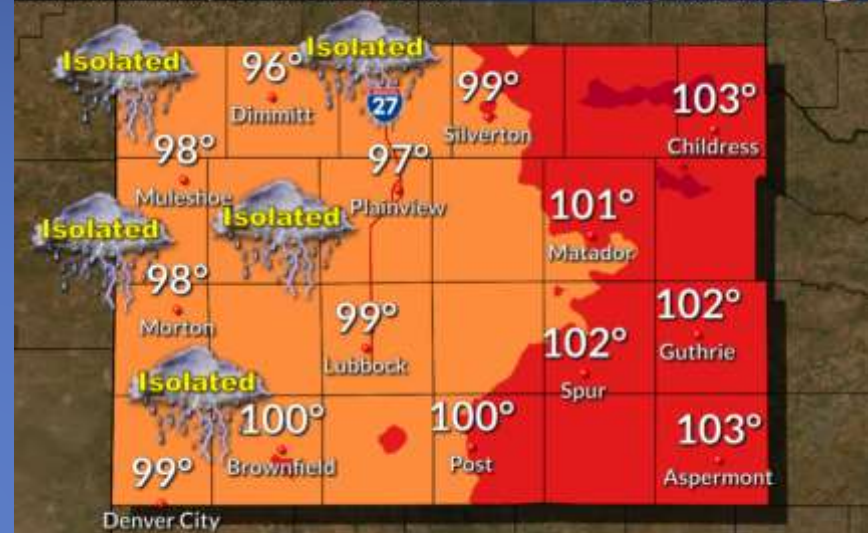

weather.gov/ama

Thunderstorms are expected this afternoon and evening. Chances for rainfall are best in the east/northeast.

The Heat Goes On

Isolated t-storms will develop across the west late this afternoon

Weather Forecast Office
Lubbock, TX
Issued Aug 10, 2020 4:00 AM CDT

NWSLubbock

weather.gov/lub

It will be mostly sunny and hot again today, with highs in the upper 90s and lower triple digits. The intense heat will cause isolated thunderstorms to form over the western sections of the South Plains and Panhandle late this afternoon. A couple of these storms could be strong to marginally severe as they move eastward through the evening hours.

Hazardous Weather

Isolated to widely scattered thunderstorms will affect the southern Texas Panhandle and much of the South Plains late this afternoon into this evening. The most intense activity will be capable of producing wind gusts to 65 mph, quarter size hail and brief heavy rainfall.

Temperatures today will be a couple degrees hotter than yesterday, with storms once again possible across western portions of the area. Some storms across Southeast New Mexico and the northwestern Permian Basin may become strong to severe this afternoon and evening, with damaging winds the primary concern. Lightning and locally heavy rain could also accompany any storm. Stay aware if you have outdoor plans!

Hazardous Weather

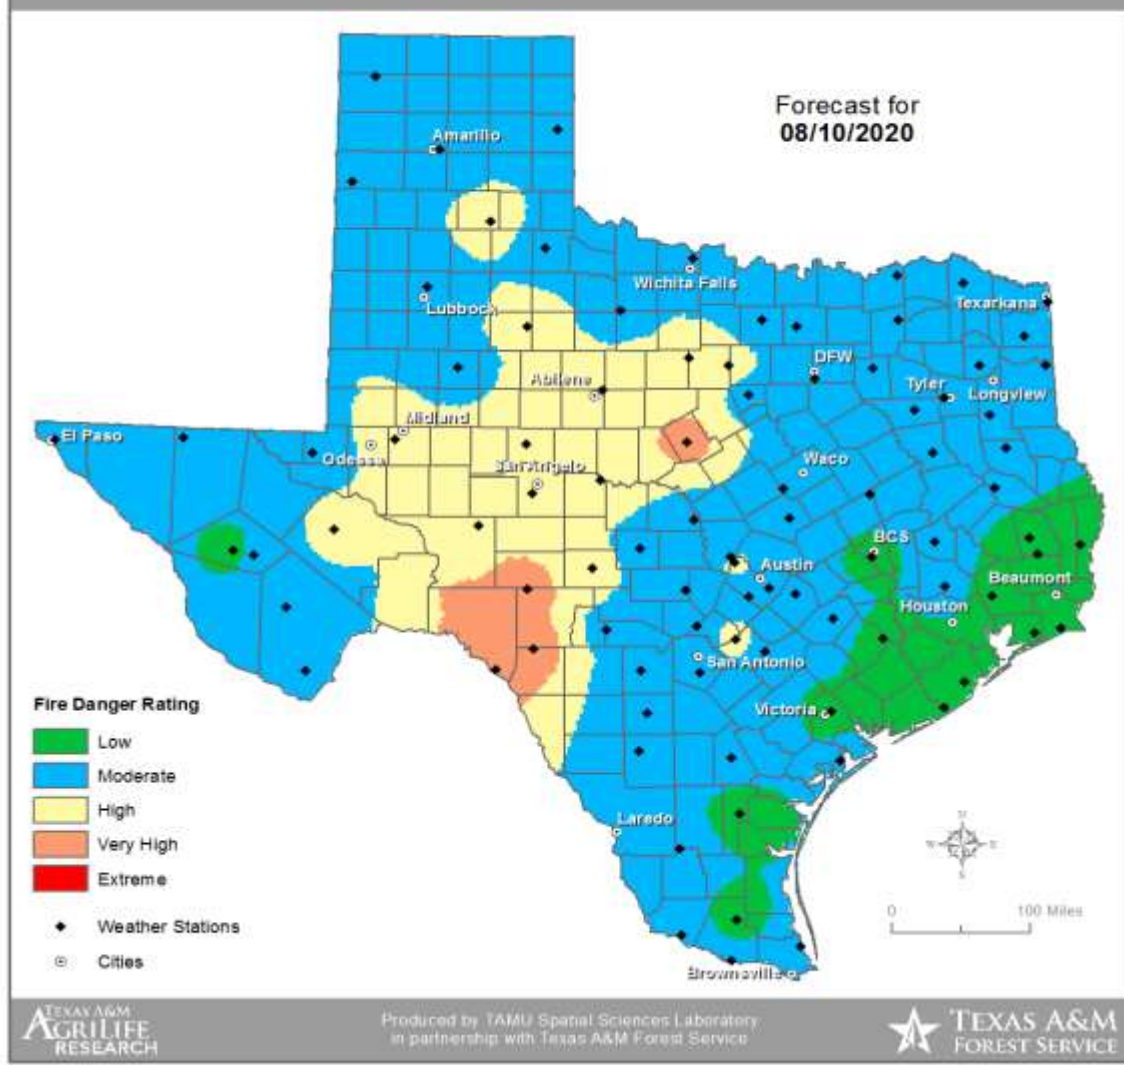

Portions of Lea county and the northwestern Permian Basin are in a Marginal Risk (level 1/5) for severe weather this afternoon and evening. The primary concern with storms that develop will be damaging winds, though locally heavy rain and frequent lightning can also be expected with any storm. Be prepared!

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
08/09/20	Flood Advisory for Poor Drainage Areas	Harris County
